

# Environmental Policy

ENGIE is a key provider of flexible, renewable electricity generation and clean, affordable energy supply to businesses of all sizes in the UK- enabling our customers and stakeholders to embrace a greener and more efficient world.

We have established this environmental policy to be consistent with the purpose and context of our organisation. It provides a framework for the setting and review of environmental objectives in addition to our commitment towards the following:

- Conforming to applicable legislative, regulatory and compliance obligations listed in IMS-R05 Legal Compliance Register & IMS- R06 Environmental Assessment & Impact Register
- Continually improving our environmental management system and to enhance environmental performance
- Helping ENGIE achieve its 2045 net zero ambition
- Helping our customers to green their energy consumption

We have produced environmental objectives which relate to this policy, and they can be found in document IMS-R04 IMS Objectives.

This policy is available to all interested parties, as well as being made available to the wider community through publication on our Website and Intranet.

This Policy will be reviewed annually and updated as necessary to ensure that it continues to align with business strategy and objectives.
